Global Management & Engineering Solutions

GMES CORPORATE PRESENTATION

Global Management and Engineering Solutions

2024

Global Management and Engineering Solutions Ltd. (GMES) stands as a premier consulting powerhouse, strategically incorporated in the dynamic business landscape of England and Wales. Our unwavering commitment is to empower companies to not just meet but exceed their potential. Whether you seek subtle adjustments or a transformative overhaul, GMES is your comprehensive solution provider.

As a global player, GMES extends its reach through branches and subsidiaries meticulously registered in key international hubs, including London-UK, Romania, UAE, Switzerland, India, Uzbekistan, Kyrgyzstan, and the Republic of Tajikistan. This strategic footprint enables us to seamlessly cater to diverse markets, tapping into the unique nuances of each locale while maintaining a consistent standard of excellence.

At GMES, we boast an extensive array of resources and a seasoned team of experts proficient in project management, finance, tax, legal, valuation, and financial services. This robust foundation positions us as a trailblazer in the execution of projects across the energy, infrastructure, and utilities sectors. Our management team, characterised by unparalleled expertise and strategic acumen, ensures the seamless implementation of projects, no matter the scale or complexity.

Every facet of our operations is intricately designed to create tangible value for our clients, positioning them at the very core of our business philosophy. We firmly believe that their success is not just a goal but the heartbeat of our organisation. Our services are available around the clock, ensuring that you receive precisely what you need, precisely when you need it.

At GMES, we don't just navigate the business landscape; we sculpt it. Our commitment to excellence, coupled with a global perspective and local insight, positions us as the go-to partner for companies aspiring to soar to new heights. Embrace the future of consultancy with GMES – where potential meets precision, and success is not just a destination but a journey we embark on together.

THE EXECUTIVE CHAIRMAN

Based on our strategy we have continued to expand our global network while providing high value-added consulting services that assist our valuable clients in expanding their business operations on an International Best Practice (IBP) basis.

Since the establishment, every personnel and consultant at GMES has been striving to provide consulting services at with their maximum professional competence to have our client satisfaction.

Indeed, no matter how difficult the challenge or how long the process, we are thoroughly examining our clients' challenges and obstacles then enable them to achieve their selected goals and objectives based on our extensive experience and scientific knowledge

We take seriously our responsibility, and through effective communication and professional approaches, It is our policy to contribute to work closely with each client with a sense of commitment on a long-term basis to ensure that the best practices are integrated into their business operation.

Then to each client, we deliver the best practices, taking into account the different cultural aspects and business customs of each country and locality. It is our policy to continue to work closely with each client with a sense of commitment on a long-term basis to ensure that the best practices are integrated into its operations.

Pursuing business growth can be an exciting endeavour. However, it can feel challenging to remain motivated to take risks or try new things in hopes of succeeding

I am pleased to convey this message on behalf of the core team and all senior consultants of the GMES. This is the value proposition of GMES IS HERE TO SERVE YOU!

JAN G. JANSSENS
The Executive Chairman

VISION

A hub for brilliance in applied exploration,compeations and scientific solutions for sustainable development.

VALUE

To be your business companion, with respect,accountabilities, integrity, loyalty and innovatorwith the latest scientific methodology for the growth of your businesses.

MISSION

To be the firm of choice and fully trusted partnerfor companies and all individuals who wants to put their assets and values at the core of theirbusiness for brighter tomorrow.

OUR QUALITY DELIVERY POLICY

According to our in-depth research and vast experience, we anticipate that by 2027, a predominant share of work will be project-based. Consequently, the demand for adept Project Managers is surging at a pace unparalleled by the demand for skilled workers in other occupations. Recognizing this paradigm shift, GMES is poised to lead the way in meeting and exceeding these evolving needs.

We firmly believe that innovation serves as the pulsating nerve centre of all creativity. Only organisations that adapt swiftly to the ever-changing business landscape can withstand the test of time and emerge victorious. To embody this philosophy, we employ a multi-faceted approach:

- **Strategic Recruitment:**
We meticulously recruit staff and associate specialists, ensuring that their scientific education, professional experience, ethics, and social attitudes align seamlessly with our unwavering commitment to quality.
- **Continuous Improvement:**
We set and review quality objectives annually, using each successful project as a stepping stone for ongoing improvement, thereby ensuring a trajectory of excellence.
- **Learning Environment:**
GMES fosters a dynamic learning environment where the growth and development of our employees are actively encouraged and supported, creating a workforce prepared for the challenges of tomorrow.
- **Global Collaboration:**
We advance our global capabilities by fostering a culture of sharing experiences, knowledge, and resources among and between consulting practices and offices, creating a collaborative ecosystem that transcends borders.
- **International Standards:** Our commitment to excellence extends to our global business systems, which are continually enhanced to meet and exceed international standards.

- **Technological Innovation:**
We explore new technologies and methodologies, embracing them where relevant, to stay at the cutting edge of industry advancements.
- **Strategic Partnerships:** GMES actively builds synergistic relationships with strategic partners, aligning with entities that complement our vision and amplify our collective impact.

At GMES, we don't just anticipate change; we embrace it, driving innovation, fostering excellence, and ensuring our clients thrive in the ever-evolving business landscape. Our journey is characterised by adaptability, collaboration, and an unwavering commitment to pioneering solutions that define the future.

OUR APPROACH

At Global Management and Engineering Solutions Ltd. (GMES), our approach is not just conventional; it's practical, creative, and above all, collaborative. We approach each client's challenge with an open toolbox and an open mind, recognizing that innovation often emerges from the intersection of diverse perspectives. Our commitment is to deeply consider every facet of our clients' challenges, listening intently and integrating their vast experience into the fabric of practical solutions tailored to navigate the complexities of a dynamic and developing world.

Our approach is inherently progressive, embracing both time-tested and contemporary methods to solve day-to-day individual, organisational, and social challenges in a sustainable manner. We don't just navigate the currents of change; we proactively shape them to empower you to thrive in an ever-evolving landscape.

As a progressive and innovative international consulting firm, we are highly in tune with today's pop culture in business and current market trends. As such, we are proud to offer you cutting edge ideas and concepts to meet your ever changing business needs. We take pride in providing

- Improving efficiency, effectiveness and coverage of public services
- Increasing transparency and accountability
- Developing trust, credibility and reputation
- Increasing flexibility to address variances in customer demands
- Facilitating better information sharing within associated partners, shareholder and stakeholder
- Promoting progress and innovation
- Maintaining Customer trust as they expecting from our services

KEY BENEFITS FOR OUR PARTNERS

ADVANTAGES OF OUR COMPANY

As a distinguished leader in the realm of business management and engineering consulting, GMES Consulting stands tall as a beacon of excellence. Our firm is distinguished by a robust management team, poised and ready to execute a diverse array of projects spanning institutional management, utilities, and infrastructure sectors. We don't just provide solutions; we orchestrate success.

At GMES Consulting, we pride ourselves on our innovative and scientific approach to modern challenges. Every client's unique challenge is met with an open toolbox and an open mind, reflecting our commitment to tailoring solutions that transcend the ordinary. Recognizing that each company and individual is distinct, we pledge to deliver customised solutions that align precisely with their aspirations and requirements.

Our reputation as a reputable consulting firm is built on the foundation of a strong management team that steers the ship toward excellence. We possess the expertise and acumen to implement projects of varying complexities, ensuring that every venture is executed with precision and efficacy.

OUR BUSINESS strategy

At the core of our organisational ethos lies a robust and dynamic business strategy, far transcending the conventional notions associated with strategic planning. We firmly believe that a business strategy is not merely a static document generated periodically; rather, it is a living, breathing blueprint that propels us forward into the future.

Our interpretation of business strategy goes beyond a routine planning exercise; it is a meticulously crafted process, an intricate dance of foresight and adaptability. It serves as a compass, guiding us through the complexities of the business landscape and providing a framework for decision-making that resonates with purpose and vision.

In our view, the importance of business strategy is not a universal constant but a variable, adapting and evolving in response to the dynamic nature of our organisational circumstances. We understand that, for some organisations, it may be the linchpin that steers them towards unparalleled success, while for others, its significance may lie in a more nuanced role.

HOW WE WORK

● Embracing a Unique Work Culture

Freedom, Responsibility, and Autonomy:

Step into our work environment and experience a paradigm shift. We take pride in our unconventional approach where you'll find not just freedom and responsibility but also autonomy. Shape your role to align with your strengths because we understand that our collective success hinges on letting you define how you work best.

Work-Life Balance:

Autonomy extends beyond your tasks; it permeates your work-life balance. We recognize that your success is intertwined with your well-being, and we empower you to strike a balance that suits your lifestyle. Here, your role isn't just a job; it's a canvas for you to craft in alignment with your unique approach.

Mutual Trust:

In our dynamic workplace, trust is the bedrock. We believe in each other's capabilities to get things done. It's a shared commitment to excellence where every team member is entrusted with the responsibility to contribute to our collective success.

● Unconventional Perspectives on Business Strategy

Dynamic View of Business Strategy:

We don't see business strategy as a static document; it's a living blueprint for success. Whether viewed as a planning document, a process, or a purposive set of actions, we understand that its importance varies for each organisation based on its circumstances.

Leadership Wisdom:

Drawing inspiration from Chris Hadfield, we recognize that leadership is not about grand gestures but about steering the team towards a common goal. It's about setting the stage for others' success and allowing their brilliance to shine.

● How We Navigate Challenges

Defining Real Challenges:

Before taking action, we immerse ourselves in understanding your business intricately. Together, we unearth the core challenges, addressing root causes rather than superficial symptoms.

Speed and Flexibility:

We believe in the synergy of speed and innovation. Our nimble process ensures we can move swiftly while staying adaptable, enabling us to pivot seamlessly when needed.

Human-Centred Lens:

Our approach is deeply empathetic. We delve into the customer and employee experience, deciphering the emotions that drive decision-making. This human-centred focus informs our problem-solving.

Relationships as Cornerstones:

We're not about quantity; we're about quality. Fostering meaningful connections with a select clientele allows us to go beyond contractual obligations. It's through these relationships that we gain the knowledge and trust to contribute to lasting achievements.

In every facet of our work, from our unique work culture to our unconventional perspectives on business strategy, we defy the norm. At our core, we embrace change, foster collaboration, and empower individuals to be architects of their success. Welcome to a workplace where innovation knows no bounds, and every voice shapes the narrative of our collective journey.

- **Urban development**

Urban development

Planning System and Local Capacity

At the heart of our Planning System lies a focus on Local Capacity – a strategic initiative aimed at empowering communities by harnessing their inherent strengths. We believe in the power of local knowledge and community involvement, ensuring that our plans are not only visionary but also rooted in the unique needs and aspirations of the residents. By fostering a sense of ownership and engagement, we aim to build resilient cities that evolve organically with the dynamic needs of their inhabitants.

With our holistic approach to city planning, we navigate the complexities of urban development, seamlessly coordinating various elements to create spaces that stand the test of time. Our commitment to sustainable practices and community-driven design sets us apart, as we strive to create urban environments that not only meet the needs of today but also lay the foundation for a vibrant and resilient future. Join us in shaping cities that inspire, connect, and thrive. resilient cities that evolve organically with the dynamic needs of their inhabitants.

Climate Smart and Urban resilience

Our focus on Climate Smart initiatives involves developing solutions that minimize carbon footprints, enhance energy efficiency, and promote renewable resources. By seamlessly blending technology with nature, we create urban landscapes that not only withstand environmental challenges but also thrive in harmony with the ecosystems around them.

Join us on the journey to foster Climate Smart and Resilient cities, where sustainability meets innovation. Together, we can build urban environments that not only withstand the tests of time and nature but also serve as beacons of inspiration for future generations.

Urban Infrastructure

Our team is dedicated to creating designs that not only meet the current needs of communities but also anticipate and adapt to future challenges. Through collaborative planning and advanced technologies, we ensure that our urban infrastructure is not only resilient but also environmentally conscious. Smart city solutions, green spaces, and interconnected networks are at the forefront of our design philosophy, fostering a holistic urban experience that enhances the quality of life for residents.

Public Transport

Our team is dedicated to fostering a future where public transportation is not just a means of getting from point A to B but an integral part of urban lifestyle. By incorporating cutting-edge technologies, user-centric design, and sustainable practices, we aim to redefine the narrative around public transport, making it a reliable, comfortable, and eco-conscious choice for all residents.

Join us in shaping urban environments where public transport is not just a service but a cornerstone of community well-being. Together, we can create cities that move efficiently, sustainably, and with a focus on the needs and aspirations of the people who call them home.

Urban Planning

With an unwavering dedication to precision, our team works to ensure that every element of urban planning aligns with the unique character and aspirations of the community it serves. Whether it's the creation of green spaces, the development of smart infrastructure, or the enhancement of public services, our goal is to cultivate environments that foster a high quality of life for all.

Urban Water and Sanitation

From advanced water treatment solutions to strategic sanitation infrastructure, we prioritize innovative designs that contribute to the overall well-being of communities. We understand the critical role that water plays in urban life, and our mission is to craft resilient systems that address both current and future demands, promoting a harmonious coexistence between urban development and environmental conservation.

As custodians of urban water and sanitation, we take pride in our meticulous planning that extends beyond utility to encompass community needs and environmental impact. Through the integration of smart technologies and sustainable practices, we strive to shape cities where water is conserved, sanitation is dignified, and public health is prioritized.

Urban sanitation and waste management

We understand that effective waste management is integral to public health, environmental preservation, and the overall quality of urban life. By employing cutting-edge technologies and community engagement strategies, we seek to build resilient waste management systems that adapt to the dynamic needs of growing cities. Our commitment extends beyond the collection and disposal of waste; we envision cities where waste is viewed as a valuable resource, contributing to a circular economy that minimizes environmental impact.

Urban housing

Our team is dedicated to the principle that housing is a cornerstone of urban life, and as such, it should embody principles of inclusivity, sustainability, and innovation. Through meticulous planning, we strive to balance the demands of urban density with the creation of living spaces that prioritize comfort, safety, and connectivity. We understand that housing is more than just a physical structure; it's a catalyst for community growth and individual prosperity.

Urban Flood management

From cutting-edge stormwater drainage systems to green infrastructure solutions, we prioritize designs that safeguard communities against the increasingly frequent threats of urban flooding. Our commitment extends beyond crisis response to proactive planning, as we aim to create cities that are not just resilient to floods but are also in harmony with their natural surroundings.

Green cities and energy

Our team is dedicated to crafting cities that not only inspire through their architectural prowess but also contribute to a healthier planet. Through innovative designs, renewable energy solutions, and forward-thinking planning, we create urban environments that are vibrant, resilient, and in harmony with the natural world.

Low Carbon Public Transit development or Expansion

Embark on a sustainable and forward-thinking journey with our focus on Low Carbon Public Transit development or expansion. We specialize in the meticulous design, strategic planning, and efficient management of city assets to enhance public transportation with a minimal carbon footprint. Our commitment extends beyond traditional transit systems; we envision and implement cutting-edge solutions that prioritize clean energy, reduce emissions, and promote eco-friendly modes of commuting.

From expanding electric bus fleets to developing cycling infrastructure, our approach centers on creating urban environments that champion low-carbon public transit options. We understand that a well-designed and sustainable transportation network is crucial for reducing environmental impact while providing efficient and accessible mobility for all residents.

Energy

Wind Power

Enter the realm of sustainable energy with our commitment to Wind Power. We specialize in harnessing the inexhaustible power of the wind to generate clean and renewable energy. Our approach involves the strategic planning, cutting-edge design, and efficient management of wind power assets to contribute to a greener and more sustainable future. From towering wind turbines that gracefully harness the wind's kinetic energy to innovative technologies that optimize power production, we strive to shape a world where clean energy sources play a pivotal role in meeting the increasing demands of our dynamic society. Join us in championing the wind power revolution and be part of creating a cleaner, more sustainable energy landscape that powers communities while preserving the planet for generations to come.

Solar Power

Step into the radiant world of sustainable energy with our dedication to Solar Power. We specialize in harnessing the boundless energy of the sun to create clean and renewable power solutions. Through meticulous design, strategic planning, and efficient management, we transform sunlight into a reliable and eco-friendly source of electricity. Our approach extends beyond mere energy production; we envision a future where solar power plays a central role in meeting the world's growing energy needs while minimizing environmental impact.

Hydroelectric

From small-scale run-of-river projects to large hydroelectric plants, our expertise lies in developing solutions that balance energy needs with ecological considerations. Hydroelectric power not only contributes significantly to reducing greenhouse gas emissions but also offers a dependable source of electricity that can adapt to the evolving demands of our dynamic world.

Energy generation, distribution and management

In the realm of Energy Generation, Distribution, and Management, we leverage innovation to create a seamless and sustainable energy journey. Whether it's optimizing energy distribution grids for efficiency, implementing smart technologies for real-time monitoring, or integrating renewable sources into the mainstream, our holistic approach ensures a resilient and forward-thinking energy landscape.

Join us in revolutionizing the way energy is generated, distributed, and managed. Together, let's build a future where clean, reliable, and accessible energy is not just a necessity but a catalyst for progress and a cornerstone of sustainable development.

Climate Change

Welcome to our commitment to combat Climate Change and pave the way for a sustainable future. Our focus on transformative technologies, such as solar, wind, wave, tidal, and geothermal power, lies at the heart of our mission. Through these renewable energy sources, we aim to reduce reliance on fossil fuels and mitigate the impact of climate change. By harnessing the power of the sun, wind, and Earth's natural forces, we strive to create a diverse, eco-friendly energy portfolio that aligns with the urgent need for decarbonization.

Embracing electric vehicles (EVs) is a key component of our strategy to combat climate change. We promote the transition to EVs to significantly reduce carbon emissions from the transportation sector, contributing to cleaner air and a more sustainable future. As we work towards a decarbonized world, we actively support the shift to Future Fuels. By exploring innovative solutions, we aim to replace traditional fossil fuels with cleaner alternatives, fostering a low-carbon economy and reducing our carbon footprint.

Join us on this transformative journey towards a sustainable and climate-resilient future. Together, let's harness the power of innovation, embrace clean energy solutions, and pave the way for a world where environmental consciousness and technological advancement converge for the greater good. Join us in creating urban environments where every home is a foundation for a thriving community, and where the dream of a sustainable and comfortable urban life becomes a reality.

Disaster Response and Recovery

Welcome to the realm of Disaster Risk Management, where our focus extends beyond preparedness to encompass comprehensive Disaster Response and Recovery. We specialize in designing, planning, and managing strategies that ensure communities are not only ready for unforeseen disasters but can swiftly respond and recover, minimizing the impact on lives and infrastructure.

In the critical phase of Disaster Response, our approach involves deploying swift and coordinated measures to provide immediate relief to affected areas. From emergency shelters and medical aid to essential supplies distribution, our strategies prioritize the well-being and safety of communities during the crucial initial hours and days following a disaster.

As we transition into the Recovery phase, our commitment intensifies. We engage in long-term planning to rebuild communities, restore essential services, and enhance resilience against future events. By integrating innovative technologies, community engagement, and sustainable practices, we work towards rebuilding not just what was lost but creating a foundation for a more resilient and adaptive future.

Risk Management

Disaster Risk Reduction

In the core of Disaster Risk Reduction, our initiatives encompass risk assessments, early warning systems, and the implementation of sustainable practices to mitigate the impact of disasters. By understanding the specific risks unique to each region, we tailor our strategies to address both natural and human-induced hazards. Through community education, capacity-building, and the integration of technology, we empower individuals to actively participate in safeguarding their communities.

Our commitment extends beyond immediate response efforts to creating lasting change. By investing in resilient infrastructure, promoting sustainable land-use planning, and fostering a culture of preparedness, we aim to build communities that can withstand the challenges posed by disasters, minimize the loss of life and property, and recover swiftly in their aftermath.

Disaster Preparedness

In the realm of Disaster Preparedness, our initiatives focus on developing robust emergency response plans, conducting regular drills, and providing essential training to enhance the capabilities of individuals and organizations. Through community engagement and education programs, we strive to create a culture of readiness where everyone understands their role in times of crisis and knows how to access critical resources.

Our commitment extends to leveraging technology for early warning systems, ensuring that communities receive timely and accurate information to make informed decisions during emergencies. By fostering collaboration between local authorities, emergency services, and community members, we aim to build a cohesive and resilient network capable of responding swiftly and effectively to various disaster scenarios.

Flood and Drought Risk Management

For Flood Risk Management, our initiatives involve strategic land-use planning, the construction of resilient infrastructure, and the development of early warning systems. By understanding local topography, hydrology, and climate patterns, we tailor our solutions to minimize the impact of floods, protect communities, and reduce the risk of infrastructure damage.

In Drought Risk Management, our approach encompasses sustainable water resource management, efficient irrigation practices, and the promotion of drought-resistant crops. Through community engagement and education, we work towards building water-efficient practices that enhance agricultural resilience and safeguard water supplies during periods of scarcity.

Our commitment to Flood and Drought Risk Management reflects our dedication to building adaptive and resilient communities. By combining innovative technologies, data-driven strategies, and community empowerment, we strive to create environments where the impacts of water-related disasters are not only minimized but where communities can thrive in the face of changing climatic conditions.
